HEROVITAL VEGETAL

Herogra has just developed a new fertilizer, Herovital Vegetal.

HEROVITAL VEGETAL is a biological nutrient based on aminoacids with high concentration in free aminoacids (the real active ones), of fast absorption and highly effective, for both herbaceous and woody crops.

Free aminoacids are obtained by hydrolisis from fermentation of vegetal matter. It is a natural process.

Besides the nutrients it provides, furthermore, it greatly helps absorption and assimilation of macro and microelements available for the plant.

Specifications:

ELEMENTS	TOTAL % w/w
Total Organic Matter	63,2
Organic Carbon	36,5
Total Aminoacids	23
Free Aminoacids	14,5
Total Nitrogen	7,02
Ammonium Nitrogen	4,5
Organic Nitrogen	2,5
Phosphoric Anhydride (P ₂ O ₅)	0,23
Potassium Oxide (K ₂ O)	0,11
Ratio C/N	5,22

With Herovital Vegetal, we complete our range of Bioestimulants, that also includes: Herovital 10, Herovital Suprem, Herovital Radicular, Heroenraiz, Herofulvat, Aminofulvat, Leonar 15, Heromar and Herocuaje.

For further information, please contact us.
